

POF-820 Coaxial-to-Optical Converter

POF-820 Coaxial-to-Optical Digital Audio Converter transforms an RCA Coaxial (S/PDIF) Digital Audio signal to a Toslink Optical Digital Audio signal. This capability allows conversion between the most common digital audio formats.

As an example, you can connect a DVD Player or Sound Card with a Coaxial Digital Output to a Digital Amplifier or Mini Disc Recorder with an Optical Input. Power consumption is a low 50mA, 20% of the capacity of the included 115VAC to 6VDC 250mA adapter. The unit's small size and light weight make it an unobtrusive addition to systems.

POF-820 Features and Specifications

- Input: Coaxial Digital S/PDIF Audio
- Output: Optical Digital Audio
- Input Connector: RCA
- Output Connector: Toslink Optical
- Transform S/PDIF Audio to Digital Audio
- Low Power Consumption
- Compact, sturdy case
- Size: 0.8"Hx2.8"Wx1.8"D (23x72x47mm)
- Weight: 1.1 oz. (30g)
