

Recessed Cable Plate Remodeling Kit with Electrical Outlet

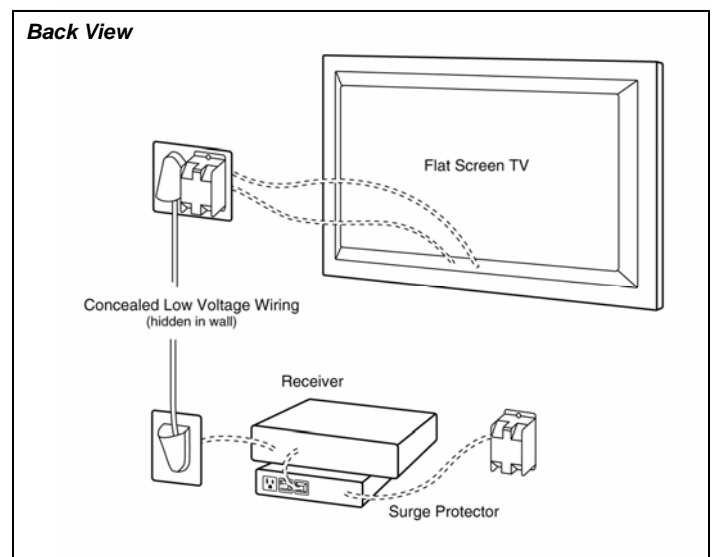

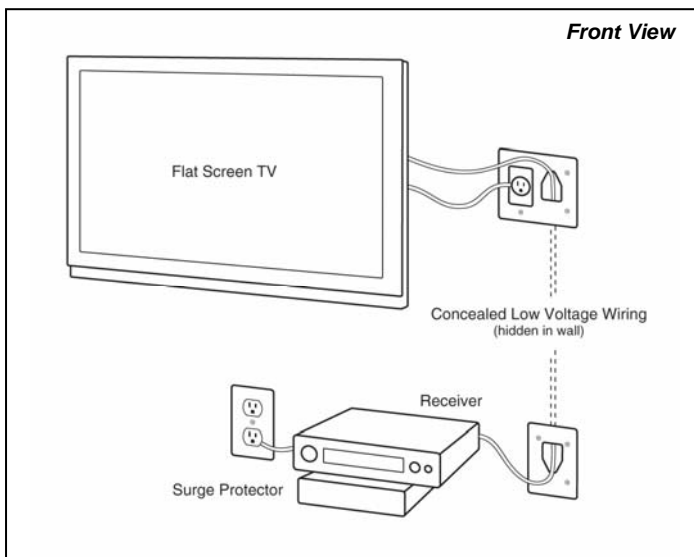

50-3321-WH-KIT

50-3321-WH-KIT

Use DataComm Electronics' Recessed Cable Plate Remodeling Kit with Electrical Outlet to install power and hide unwanted audio/video (A/V) cables behind your flat panel TV. This kit is ideal for converting an unfinished basement or spare room to a home theater or media room and will bring a clean, professional image to your at-home installation.

Have a licensed electrician install a power outlet on the wall at the location of the flat panel TV. Simply replace the newly installed power outlet with our Recessed Cable Plate with Electrical Outlet and then install the supplied Recessed Cable Plate near the location of your amplifier or other audio/video (A/V) devices. See diagrams below. The Recessed Cable Plate Remodeling Kit with Electrical Outlet comes with simple instructions for a quick and easy installation.

U.S. Patent Numbers D553475, D554475, D568719, 11355553 and 7390964.
