

Display Wall Mount PLX14 Compatibility:

- Mounting holes on television should be 28” or less apart horizontally & 18.5” or less apart vertically. This corresponds to a maximum vesa of VESA 600x400. Maximum weight capacity: 75kg / 165lbs
- This mounting bracket is not compatible with certain PIONEER and Sharp® brand TVs. Specifically, the following models are not compatible. Pioneer: PDP-6100HD, PRO-1410HD, PDP-614MX, PDP-6070HD, PRO-1540HD, PDP-607CMX. Sharp: LC-65D93U, LC-65D90U, LC-57D90U, LC-65D64U.

Dimensions:

- Wall plate: Approx. 32" x 8 7/8" *
- Measurements are from edge to edge. Mounting points for bolts will be shorter

Range of Motion:

- Tilt: 0 degree to 15 degrees down (variable)
- Swivel: None
- Extension from wall: 4.0" when it's parallel to the wall

How can I tell if my TV is VESA compliant?

Although the vast majority of TV's are VESA compliant, there are some models that are not. Please consult your TV product manual for more information. Most manuals indicate the exact VESA standard necessary for mounting, or simply indicate the VESA mounts are supported in general. If this is the case, simply purchase a wall mount within the TV size guidelines of your TV.

What is VESA?

VESA is a set of standards for the manufacturing of flat screen televisions and PC monitors. Most manufacturers comply with this standard by adhering to an industry wide “hole pattern” on the back of their displays for mounting purposes.

How do I measure my TV's VESA standard?

Look for the 4 mounting holes on the back of your flat screen television. Take both a horizontal and vertical measurement (in mm). This is your VESA Standard. A VESA hole pattern is measured in both horizontal and vertical distance between mounting holes. For example, VESA 75 x 75 means your TV mounting holes are 75mm apart horizontally and 75mm apart vertically.
